

How to set up an Amazon Echo Dot?

1. Take everything out of the box

Each box includes a power adaptor, an echo dot, an important product information booklet, a set up guideline and 'Things to Try'. Take everything out and get ready for the setup.

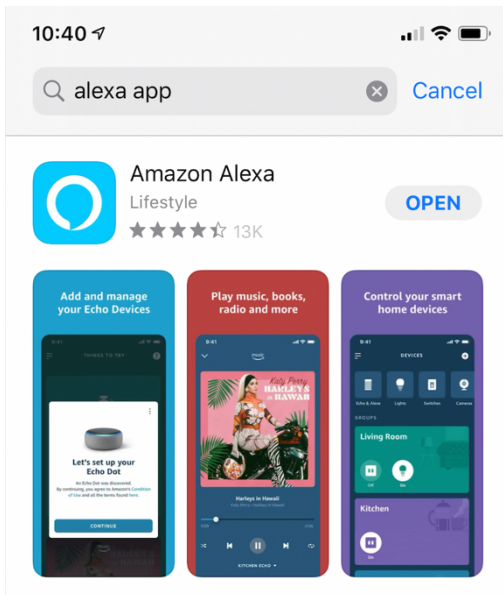

2. Plug in your Echo Dot & wait for Alexa to say hello

Plug the power adaptor into your Echo Dot and then into an electrical socket. A blue light ring will begin to spin around the top. In about 1 minute, Alexa will greet you and let you know to complete in the Alexa App.

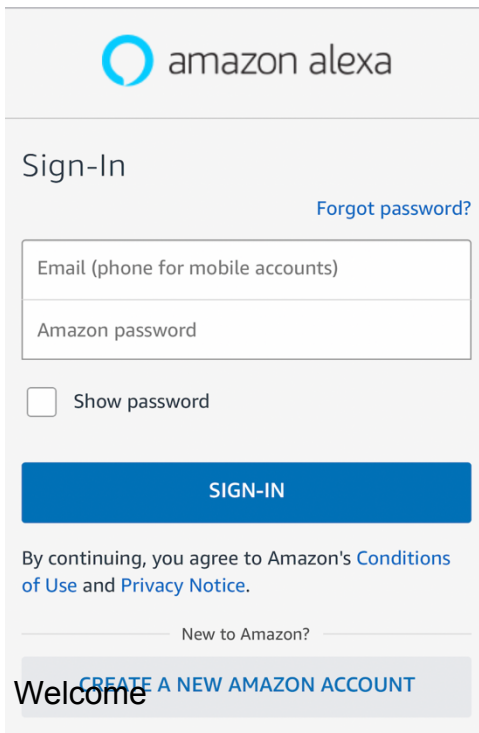

3. Download the Alexa App

Download the latest version of the Alexa App from the app store. The app helps you get more out of your Echo Dot. It's where you set up calling and messaging, and manage music, lists, settings and news.

4. Create an Amazon account

If you don't have an Amazon account, simply click on 'Create A New Amazon Account'. Fill in your name and email address followed by creating a password for yourself. Passwords must be at least 6 characters.

5. Welcome

Once you have signed in, follow Alexa's instructions to do the final setups. Welcome and enjoy!
